

Lippincotts Video Series: Nursing Procedures: Student Set on CD-ROM

This engaging video guide helps students actually see how their knowledge and skills are translated into nursing practice. Throughout the videos, students follow a team of nursing students and their instructor as they perform more than 90 nursing procedures in realistic clinical settings. The procedures are organized by basic, intermediate, and advanced, enabling students to develop and then build on a foundation of skills. Each video features a review of key points, step-by-step procedures including effective patient communications, and discussions on how to modify the procedure in response to an unexpected outcome. The engaging, conversational style and clear, realistic dialogues put viewers at ease instantly.
