

International Review Of Cytology, Volume 258: A Survey of Cell Biology (International Review of Cell and Molecular Biology)

International Review of Cytology presents current advances and comprehensive reviews in cell biology both plant and animal. Authored by some of the foremost scientists in the field, each volume provides up-to-date information and directions for future research. This volume contains articles on Mechanism of Depolymerization and Severing of Actin Filaments and Its Significance in Cytoskeletal Dynamics; Biology of Polycomb and Trithorax Group Proteins; Cell and Molecular Biology of Transthyretin and Thyroid Hormones; and Development and Role of Tight Junctions in the Retinal Pigment Epithelium.
