

Jorn Utzon Logbook: v. 5: Additive Architecture

This book series compile 5 emblematic projects by Jorn Utzon. They thoroughly describe his working process, from the original ideas and references to the definite construction plans and building pictures. They constitute the most important collection of Utzons architecture to be published until today. The architect himself was involved in the making of these books, providing and selecting its content and supervising the edition. Alongside, some major experts in his work co-edited each volume: Richard Weston, John Pardey or Mogens Prip-Buus. These books are beautifully crafted, precious objects. They are rare and will, unfortunately, not be re-edited.
